Notes

We left the car with subdued expectations this morning, but were happy to find the new snow bonding well where it hadn't been slab-ified by the wind. Near the top of Mummy's North Couloir a shallow (<6") soft slab broke at my feet as I was wallowing up the boot pack and ran a decent way down the gully- harmless in that spot but with more exposed terrain above we turned tail and enjoyed some excellent skiing.

Number of slides
1
Number caught
0
