

Mt Ellis Conditions

Date

Thu, 12/08/2022 - 00:30

Activity

Skiing

There is windloading along the ridge line but the snow is pretty unaffected on the face.

I dug 2 pits at different locations:

Pit #1: ECT N21 N28

Pit #2: ECTX

Both pits were on E slopes around 7,800 ft. Overall feeling good with the snowpack there. It does have a slightly upside down structure but couldn't get anything to fail.

Region

Northern Gallatin

Location (from list)

Mt Ellis

Observer Name

Wallace Casper
