

Collapsing on Barronette

Date

Fri, 12/22/2023 - 03:15

Activity

Ice Climbing

From YouTube comment 12/22/23: "I am an alpine climber - descended from Barronette today, went south all the way down the ridgeline and descended the gully above the start of the XC trail. Heard 10+ instances of whomping and slope collapsing under my feet on both avalanche and non-avalanche slopes on N & E aspects."

Region

Cooke City

Location (from list)

Barronette Peak
