Wind slab avalanche on Two Top

Two Top Lionhead Range 1/11/2025 Code SS-N-R1-D1 Aspect NE Latitude 44.62320 Longitude -111.25800

A <u>wind slab</u> avalanche was seen just below Two Top. This appeared to be a natural <u>slide</u> although tracks can be seen above and to the left of the crown. This was on a northeast facing slope that was wind loaded. The avalanche appeared to be fresh after recent snow.
