

Natural avalanche in Centennials

From e-mail: "Widespred slide activity from the last storm cycle, e.g. 2/14-2/18 ranging from E-NE to W.

Aspects all elevations, creek bottoms slid at 7000' and peaks slide at 9800'. DEEP crownlines. From a dist. 4'-6', mostly in wind loaded terrain, micro-ridges, and corniced areas." Photo: S. Hansen
