

## Small slab and wet loose - Cooke

A small wet loose and slab avalanche on a SW facing slope near Daisy Pass. These slides were observed on

March 17th, 2019. The wet loose looked at least a day or two old, the small slab a bit older. The slab broke ~18" deep at the ground, near some rocks. This slope had an unusually shallow snowpack.

Advisory Region

Cooke City

**Avalanche Details:** [Small snowmobile-triggered W. side Fisher Mtn.](#)
