Code
SS-AS-R2-D1.5-I
Elevation
10000
Aspect
N
Latitude
45.35810
Longitude
-111.37600
Notes

From e-mail: “We found soft snow and great skiing in the morning, with a few wind affected pockets (my partner triggered a wide but thin [wind slab](#) coming into the hellroaring basin). By noonish the winds picked up quite a bit, quickly creating thin and sensitive wind slabs as we made our way down the SE face. The small slides we created could have been dangerous in exposed terrain.”

Number of slides
1
Number caught
0
