Longitude
-109.93800
Notes
```

From email on 3/27/2020 : "natural <u>slab</u> avalanche I observed today near Cooke City. An easterly <u>aspect</u> around 9,400'. I'd estimate the crown to be 2-3' deep and about 100' wide. Looks like it was triggered by a <u>cornice</u> fall (2-3 days ago?)."
