Snow pit observations in Republic Creek

Date Mon, 12/05/2022 - 12:45 Activity Skiing

West facing slope of Woody Ridge in Republic Creek. ECTn 21 at 65cm with a 120cm snowpack (8,842ft). Observed sugary facets close to the ground that did not react in our tests. No shooting cracks, collapses, or obvious signs of instability.

Region Cooke City Location (from list) Republic Creek Observer Name B Daley
