

Watch out for wind drifts

Date

Tue, 12/13/2022 - 14:10

Activity

Snowmobiling

Paraphrasing from a text from [Six Points Avalanche Education](#):

We dug in the 2nd Yellow Mule. Wind slabs were the primary problem and we were getting consistent ECTPs in the mid 20's on wind-loaded slopes. If the slope did not have a wind load, the [slab](#) was missing.

Region

Northern Madison

Location (from list)

Buck Ridge

Observer Name

Eric Knoff
