Watch out for wind drifts

Date Tue, 12/13/2022 - 14:10 Activity Snowmobiling

Paraphrasing from a text from Six Points Avalanche Education:

We dug in the 2nd Yellow Mule. Wind slabs were the primary problem and we were getting consistent ECTPs in the mid 20's on wind-loaded slopes. If the slope did not have a wind load, the slab was missing.

Region Northern Madison Location (from list) Buck Ridge Observer Name Eric Knoff
