Activity

Skiing

Dug a quick pit on a west aspect on the west side of Woody Ridge. HS was 178 cm. ECTN 29, 1.5' below surface on 1.0 mm rounding facets. Skied off the west side of the ridge. The snow was more wind drifted towards the bottom of our run, 4-6" wind skin in spots. We didn't see any signs of avalanche activity. Snow started falling lightly around 1400.
