

Sawtelle Weather station maintenance

Date

Wed, 11/15/2023 - 16:10

Went to do maintenance on the Sawtelle Snowfall weather station at 8800 ft just off the Sawtelle Mountain Road. Continuous snowcover starts around 8000 ft. At 8800 ft there is ~20" of snow with a mix of hard crusts and weak facets. These weak layers near the ground will be something to watch once snows again.

Region

Island Park

Location (from list)

Sawtelle Peak

Observer Name

Ian Hoyer
