

Zimmer Creek Avalanche

Date

Sun, 01/21/2024 - 12:15

Activity

Skiing

Remote triggerd a D1 Avalanche from about 150' away. Crown was 1-2' deep. The debris ran onto an apron that was shared with a larger slope which subsequently triggered a larger D2 Avalanche that was about 100' wide with a 3'-4' crown. Lots of cracking and collapsing of the snow pack all day and remote triggered a few other smaller slopes during the day. The snowpack is very sensitive out there right now.

Region

Cooke City

Location (from list)

Zimmer Creek

Observer Name

Ben Zavora
