

Wind Slab South of Cooke City

Woody Ridge

Cooke City

2/25/2024

Code

HS-AS-R1-D1-I

Elevation

9900

Aspect

W

Latitude

44.97390

Longitude

-109.92400

Notes

From Obs: "Toured up the west side of Woody via Central Park approach. Moderate to high wind gusts at the ridge line. Skied a couple laps in variable conditions on Sub bowl and then returned to the West [aspect](#) for a lap down South Central .

Traversed into the tube at tree-line roughly 9900' and triggered a small [wind slab](#). Crown was around ~1 foot deep and maybe 40 feet wide. Possibly stepped down a bit once in the tube and then ran for about 300 feet.
