Wind Slab avalanches in Frazier Basin

Date Wed, 03/27/2024 - 10:05 Activity Skiing

From IG: Very touchy on Hollywood wall this morning. All slopes easily propagated 4-6" deep on a firm <u>bed</u> <u>surface</u>. Most were less than 50' wide with the exception of the <u>slide</u> in the <u>couloir</u> which propagated down the entire <u>couloir</u>, maybe 500' wide, and ran through the exits into the main bowl.

Region Bridger Range Location (from list) Frazier Basin Observer Name Max Cohen
