North of Cooke City

Date
Mon, 12/16/2024 - 12:40
Activity
Skiing

Went out north of Cooke City today for some skiing. Dug a pit at 9980' on a southwest facing, windloaded slope with a slope angle of about 15 degrees. We found 105cm of snow. Our ECT gave us an ECTP29 55cm up from the ground on what seemed to be the buried surface hoar layer. It was snowing and blowing all day out there.

Region
Cooke City
Location (from list)
Henderson Mountain
Observer Name
Noah Mattes
