

Margarets Meadow

Date

Sun, 03/16/2025 - 12:25

Activity

Skiing

Toured into Margaret's Meadow this afternoon. 2" of dense snow over a 1/2 of graupel, on top of a wind crust. Light winds from the SSE. Light wind loading on the N, and NE aspects. No cracking or collapsing, and new snow seems to be bonding (at least on lesser angled slopes). Skiing conditions were surprisingly good.

Region

Bridger Range

Location (from list)

Brackett Creek

Observer Name

C. Robinson
