

Snow Pit Profile

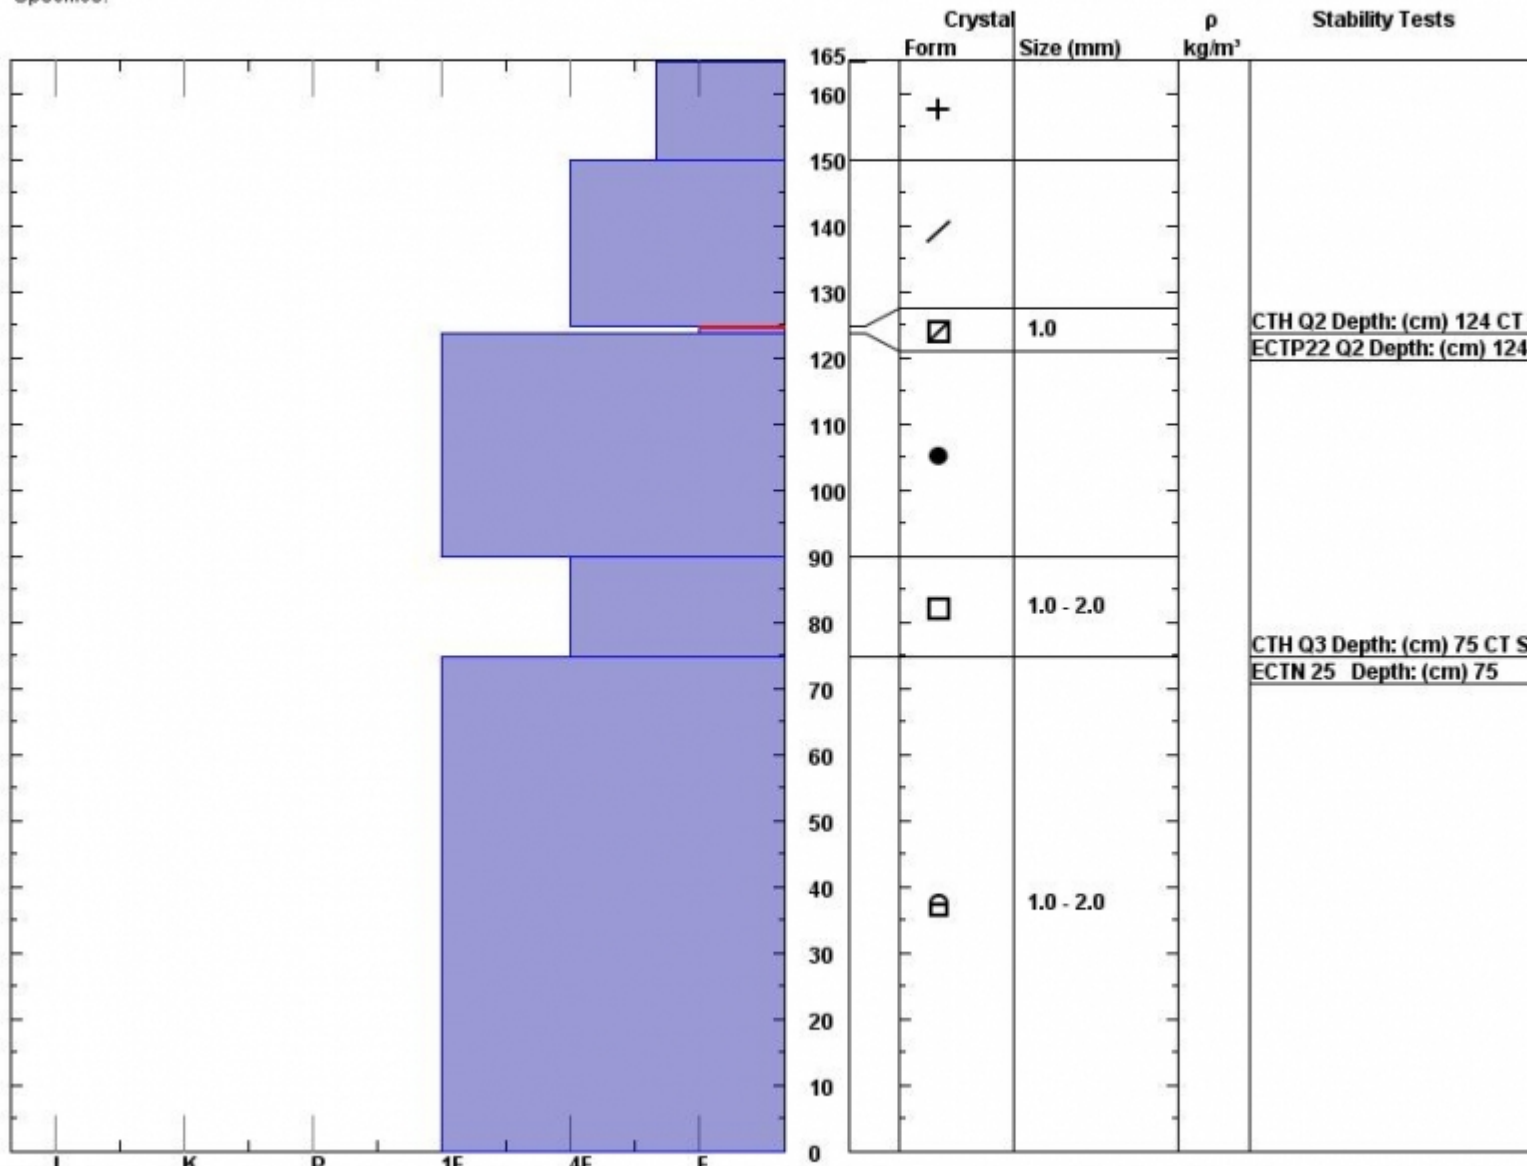

Observer: **Eric Knoff**Stability on similar slopes: **Good**

Stability Test Notes:

Layer notes:

Sat Mar 02 12:19:00 MST 2013Air Temperature: **F****124-125: F****Bridger Range, MT**Co-ord: **N W**Sky Cover: **sky 4/8 to 8/8 covered**Elevation (ft) **8400**Slope: **36**Precipitation: **None**Aspect: **300**Wind loading: **no**Wind: **SW Moderate**

Specifics:

Notes: This particular slope had a deep and relatively stable snowpack. We did not get any cracking or collapsing on the NSF layer. As always on the v slope 100 feet away had a totally different structure. As long as the snowpack is more than a meter deep stability seemed good.
