

Natural wet slab Blackmore

Mt Blackmore

Northern Gallatin

3/23/2019

Code

WS-N-R1-D1.5-G

Elevation

7400

Aspect

W

Latitude

45.46630

Longitude

-110.98400

Notes

Skiers in Hyalite saw a natural wet [slab](#) near Blackmore Lake. From the email: "The [slide](#) was located around 300 yards South of Blackmore Lake on a West facing slope at an elevation just above 7400 feet. It broke below a cliff band about 3' deep (to the ground) and ran a few hundred feet (almost to the skin [track](#))." Photo: JR Mooney
