

## Large avalanche on wind-loaded slope in Slushman's Ravine

This large avalanche was triggered intentionally by the Bridger Bowl Ski Patrol at the ridgeline above little Slushman's Ravine. They were cutting a cornice and it broke 7 feet back from the edge, 4 feet deep and 150 feet wide. It was a hard slab avalanche and ran 1150 feet. It was east facing and broke on a crust formed in the early season. It's code is HS-AC-R2-D3-O-TL. Photo: BBSP
