

Large avalanche in Mundy's Bowl at Bridger Bowl

The Bridger Bowl Ski Patrol triggered this slide on a heavily wind-loaded east facing slope at the ridgeline. They wrote, "With a shovel push the vertical cornice/pillow broke 15"-36" deep on a steep and rounded bulge just south of Lee's Leap running on the crust. The debris terminated well below Pat's Chute." Its code is HS-AC-R2-D2-O-TR. Photo: BBSP

Advisory Region

Bridger Range

Longitude

-110.92W

Latitude
