

Skier remotely triggered a small wind slab in Hyalite

This small wind slab was remotely triggered while skinning into the Maid of the Mist basin. Throughout the day they continued to encounter other small, reactive wind slabs and strong winds. Small avalanches are a warning sign that larger ones are possible. Photo: Sam Wilson

Advisory Region
Northern Gallatin

Longitude

-110.97W

Latitude

45.42N

Avalanche Details: [Skier remotely triggered a small wind slab up Hyalite](#)

Northern Gallatin, 2019-12-31
