

Natural Avalanches on Buck Ridge

Buck Ridge

Northern Madison

1/11/2020

Code

N-R2-D2-O

Elevation

9150

Aspect

NE

Latitude

45.18580

Longitude

-111.41700

Notes

We could see a few avalanches that likely broke yesterday on 1/11/2020.

1. The wind pillow under the large cornices in 2nd Yellowmule broke. It looked like just the wind load, vs breaking at the ground. 200' wide x 150' vertical 1-2 feet deep.
2. In the 3rd Yellowmule a wind-loaded slope avalanched 200' wide, 75' vertical and 2 feet deep. It broke on a layer of weak, [ffaceted snow](#) near the ground.
3. Off the east ridge of MacAtee Ridge we could make out 3 [slab](#) avalanches that released naturally. Only one looked big enough to bury a person.
