

Remote Triggered Avalanche 1 - Ski Hill

We triggered this avalanche from 50 feet away. We were walking on a low-angle slope, collapsed the slope, and where the pitch got steeper, we had an avalanche. This is an obvious sign of dangerous instability. If you are on steep slopes it is **LIKELY** that you will trigger an avalanche. Today, we triggered two avalanches. Photo: GNFAC

Advisory Region

Lionhead Range

Longitude

-111.29W

Latitude

44.70N
