

Alex Lowe N Aspect

From Obs 2/9/21: "Up/down the SE Ridge of Blackmore today. No cracking/collapsing observed. One large avalanche observed, on the path adjacent to the N Couloir on Alex Lowe. More or less went full path, I would estimate 2m max crown depth. HS-N-R4/D2.5-O. Observed several size 1 slabs that failed within new snow during the day on N aspects." Photo: S. Hennessey

Advisory Region

Northern Gallatin

Longitude

-111.01W

Latitude

45.43N

Avalanche Details: [Natural, North Face Alex Lowe](#)

Northern Gallatin, 2021-02-09
